Autopilot Andrew Smart 2013-07-01 Andrew Smart wants you to sit and do nothing much more often – and he has the science to explain why. At every turn we're pushed to do more, faster and more efficiently: that drumbeat resounds throughout our wage-slave society. Multitasking is not

only a virtue, it's a necessity. Books such as *Getting Things Done*, *The One Minute Manager*, and *The 7 Habits of Highly Effective People* regularly top the bestseller lists, and have spawned a considerable industry. But Andrew Smart argues that slackers may have the last laugh. The latest neuroscience shows that the “culture of effectiveness” is not only ineffective, it can be harmful to your well-being. He makes a compelling case – backed by science – that filling life with activity at work and at home actually hurts your brain. A survivor of corporate-mandated “Six Sigma” training to improve efficiency, Smart has channeled a self-described “loathing” of the time-management industry into a witty,

informative and wide-ranging book that draws on the most recent research into brain power. Use it to explain to bosses, family, and friends why you need to relax – right now.

Managing the Primary Classroom Ian Craig 1990 Management has been identified as a key area of need for inservice training of teachers. This book covers the management of key aspects of classroom organization and teaching. The chapters are written by practising teachers and education advisers from across the country. Topics covered include team and collaborative teaching, the integrated curriculum, time management, use of resources and the use of the schools' and local environments. This second edition contains revised chapters from the previous edition.

Technical English 1 David Bonamy 2008 Technical English Level 1 covers the core language and skills that students need to communicate successfully in all technical and industrial specifications.

Click on Virginia Evans 2003 Click On is a five-level course consisting of five modules each for learners of English from complete beginner to intermediate level. In full colour, the course combines active English language learning with a variety of lively topics presented in themed units. Its well-organised syllabus promotes the gradual development of all four language skills needed by learners to communicate effectively in English. The cross-cultural approach of the course stimulates learners' interest,

focusing on topics carefully chosen to motivate. The Student's Book and the Workbook for each level are designed to be covered in approximately 70 to 80 hours of classroom work.

English Medium Instruction in Higher Education in Asia-Pacific Ben Fenton-Smith 2017-03-19 This volume draws together the viewpoints and research findings of leading scholars and informed local practitioner-researchers throughout Asia-Pacific about the issues and challenges of English as a medium of instruction (EMI) at higher education institutions in that region. Specifically, it addresses four key themes: Macro-level EMI policy and practice; institutional implications for pedagogy; stakeholder perceptions of EMI; and challenges of interpersonal interaction in EMI contexts. The book is among the first to critically examine the emerging global phenomenon of English as a medium of instruction, and the first title to exclusively explore Asia-Pacific tertiary contexts. It will be of particular interest to policy-makers in international education and tertiary educators seeking blueprints for practice, as well as scholars and postgraduate students of English as a lingua franca, English for academic purposes, academic language and learning, and language education in Asia-Pacific.

National Union Catalog 1978 Includes entries for maps and atlases.

Bandwidth Recovery Cia Verschelden 2017 Published in association with AAC&U This book argues that the cognitive resources for learning of over half our young people have been diminished by the negative effects of economic insecurity, discrimination and hostility against non-majority groups based on race, ethnicity, sexual orientation, or gender identity, and other aspects of difference. Recognizing that these students are no different than their peers in terms of cognitive capacity, this book offers a set of strategies and interventions to rebuild the available cognitive resources necessary to succeed in college and reach their full potential. Members of these groups systematically experience conditions in their lives that result in chronic stress and, therefore, decreased physical and mental health and social and economic opportunity. The costs of the many kinds of scarcity in their lives - money, health, respect, safety, affirmation, choices, belonging - is seriously reduced "mental bandwidth," the cognitive and emotional resources needed to deal with making good decisions,

learning, healthy relationships, and more. People who are operating with depleted mental bandwidth are less able to succeed in school, starting in childhood, and are much less likely to make it to college. For those who do make it, their bandwidth capacity often interferes with learning, and therefore, persisting and graduating from college. This book presents variety of evidence-based interventions that have been shown, through implementation in high schools and colleges, to help students to regain bandwidth. They are variously intended for application inside and outside the classroom and address not only cognitive processes but also social-psychological, non-cognitive factors that are relevant to the college environment as a whole. Beginning with an analysis of the impacts on mental and physical health and cognitive capacity, of poverty, racism, and other forms of social marginalization, Cia Verschelden presents strategies for promoting a growth mindset and self-efficacy, for developing supports that build upon students' values and prior knowledge and for creating learning environments both in and out of the classroom so students can feel a sense of belonging and community. She addresses issues of stereotyping and exclusion and discusses institutional structures and processes that create identity-safe rather than identity-threat learning environment. This book is intended for faculty, student affairs professionals, and college and university administrators, all of whom have

an interest in creating learning environments where all students have a chance to succeed.

Five-Minute Activities for Business English Paul Emmerson 2005-02-16

Short activities reflecting real-life business situations to complement both tailored and coursebook based materials.

Impact Topics Richard R. Day 2001-05-01 Impact Topics is a collection of 30 timely topics that students have expressed an interest in discussing.

The topics are organised into five categories or themes, and each topic is carefully presented with exercises to help students understand the topics and express their own ideas and values. For use with high school students.

The course contains the core language and skills which are common to a range of industrial specialisations. It presents key technical concepts concisely with labelled illustrations.

Meaningful Action Jane Arnold 2013-03-28 This work explores the importance of meaningful action for language teaching and learning, paying tribute to the enduring influence of Earl Stevick. With contributions from 19 ELT authors and influential academics, Meaningful Action draws upon and acknowledges the huge influence of Earl Stevick on language teaching. Stevick's work on 'meaningful action' explored how learners can engage with activities that appeal to sensory and cognitive processes, ensuring that meaning is constructed by the learner's internal characteristics, and by their relationship with other learners and the teacher. This edited volume focuses on meaningful action in three domains: learner internal factors and relationships between the people

involved in the learning process; classroom activity; and diverse frameworks supporting language learning.

Speak Out Frances Eales 2011-01-01 'Speakout' is a 6-level general English course for adults, bridging the gap between the classroom and the real world helping students express themselves in English.

Ratchetdemic Christopher Emdin 2021-08-10 A revolutionary new educational model that encourages educators to provide spaces for students to display their academic brilliance without sacrificing their identities Building on the ideas introduced in his New York Times best-selling book, *For White Folks Who Teach in the Hood*, Christopher Emdin introduces an alternative educational model that will help students (and teachers) celebrate ratchet identity in the classroom. Ratchetdemic advocates for a new kind of student identity—one that bridges the seemingly disparate worlds of the ivory tower and the urban classroom. Because modern schooling often centers whiteness, Emdin argues, it dismisses ratchet identity (the embodying of “negative” characteristics associated with lowbrow culture, often thought to be possessed by people of a particular ethnic, racial, or socioeconomic status) as anti-intellectual and punishes young people for straying from these alleged “academic norms,” leaving young people in classrooms frustrated and uninspired. These deviations, Emdin explains, include so-called “disruptive behavior”

and a celebration of hip-hop music and culture. Emdin argues that being “ratchetdemic,” or both ratchet and academic (like having rap battles about science, for example), can empower students to embrace themselves, their backgrounds, and their education as parts of a whole, not disparate identities. This means celebrating protest, disrupting the status quo, and reclaiming the genius of youth in the classroom.

Linguistic and Cultural Studies: Traditions and Innovations Andrey Filchenko 2017-09-18 This book features contributions to the XVIIth International Conference “Linguistic and Cultural Studies: Traditions and Innovations” (LKTI 2017), providing insights into theory, research, scientific achievements, and best practices in the fields of pedagogics, linguistics, and language teaching and learning with a particular focus on Siberian perspectives and collaborations between academics from other Russian regions. Covering topics including curriculum development, designing and delivering courses and vocational training, the book is intended for academics working at all levels of education striving to improve educational environments in their context – school, tertiary education and continuous professional development.

English Grammar in Use with Answers, Thai Edition Raymond Murphy 2002-08-20 This is an adaptation of *Essential Grammar in Use* for Thai elementary learners.

Teaching Grammar from Rules to Reasons Danny Norrington-Davies 2016
