- Multilingualism in the Graeco-Roman Worlds** Alex Mullen 2012-09-06 Through words and images employed both by individuals and by a range of communities across the Graeco-Roman worlds, this book explores the complexity of multilingual representations of identity. Starting with the advent of literacy in the Mediterranean, it encompasses not just the Greek and Roman empires but also the transformation of the Graeco-Roman world under Islam and within the medieval mind. By treating a range of materials, contexts, languages, and temporal and political boundaries, the contributors consider points of cross-cultural similarity and difference and the changing linguistic landscape of East and West from antiquity into the medieval period. Insights from contemporary multilingualism theory and interdisciplinary perspectives are employed throughout to exploit the material fully.
- The Cambridge Companion to Virgil* Charles Martindale 1997-10-02 Virgil became a school author in his own lifetime and the centre of the Western canon for the next 1800 years, exerting a major influence on European literature, art, and politics. It consists of essays by seventeen scholars from Britain, the USA, Ireland and Italy which offer a range of different perspectives both traditional and innovative on Virgil’s works, and a renewed sense of why Virgil matters today. The Companion is divided into four main sections, focussing on reception, genre, context, and form. This ground-breaking book not only provides a wealth of material for an informed reading but also offers fresh and sophisticated insights which point to the shape of Virgilian scholarship and criticism to come.

- Maeve’s Times* Maeve Binchy 2013-09-12 ‘Maeve’s Times is funny and clever and kind, which are excellent qualities in both books and people’ Irish Times ‘As someone who fell off a chair not long ago trying to hear what they were saying at the next table in a restaurant, I suppose I am obsessively interested in what some might consider the trivia of other people’s lives.’ Maeve Binchy is well known for her bestselling novels, but for many years Maeve was a journalist. From ‘The Student Train’ to ‘Plane Bores’ and ‘Bathroom Joggers’ to ‘When Beckett met Binchy’, these articles have all the warmth, wit and humanity of her fiction. Arranged in decades, from the 1960s to the 2000s, and including Maeve’s first and last ever piece of writing for the Irish Times, the columns also give a fascinating insight into the author herself. With an introduction written by her husband, the writer Gordon Snell, this collection of timeless writing reminds us of why the leading Irish writer was so universally loved.
- Mössbauer Spectroscopy Applied to Inorganic Chemistry* G.J Long 2013-11-11 In 1988 the Mossbauer effect community completed 30 years of continual contribution to the fields of nuclear physics, solid state science, and a variety of related disciplines. To celebrate this anniversary, Professor Gonser of the Universitat des Saarlandes has contributed a chapter to this volume on the history of the effect. Although Mossbauer spectroscopy has reached its mature years, the chapters in this volume illustrate that it is still a dynamic field of science with applications to topics ranging from permanent magnets to biological mineralization. During the discussion of a possible chapter for this volume, a potential author asked, “Do we really need another Mossbauer book?” The editors responded in the affirmative because they believe that a volume of this type offers several advantages. First, it provides the author with an opportunity to write a personal view of the subject, either with or without extensive pedagogic content. Second, there is no artificially imposed restriction on length. In response to the question, “How long should my chapter be?,” we have responded that it should be as long as is necessary to clearly present, explain, and evaluate the topic. In this type of book, it is not necessary to condense the topic into two, four, or eight pages as is now so often a requirement for publication in the research literature.

- Chinese Architecture and Metaphor* Jiren Feng 2012-05-31 Investigating the historical tradition of Chinese architectural writing from antiquity to the twelfth century, Chinese Architecture and Metaphor reveals significant and fascinating social and cultural phenomena in the most important primary text for the study of the Chinese building tradition. Unlike previous scholarship, which has reviewed this imperially commissioned architectural manual largely as a technical work, this volume considers the Yingzao fashi’s unique literary value and explores the rich cultural implications in and behind its technical content. Utilizing a philological approach, the author pays particular attention to the traditional and contemporary architectural terminology presented in the Yingzao fashi. In examining the semantic meaning of the architectural terms used in the manual, he uncovers a systematic architectural metaphor wherein bracketing elements are likened to flowers, flowering branches, and foliage: Thus pillars with bracketing above are compared to blossoming trees. More importantly, this intriguing imagery was shared by different social groups, in particular craftsmen and literati, and craftsmen themselves employed literary knowledge in naming architectural elements. Relating these phenomena to the unprecedented flourishing of literature, the literati’s greater admiration of technical knowledge, and the higher intellectual capacity of craftsmen during the Song, Architecture and Metaphor demonstrates how the learned and “unlearned” cultures entangled in the construction of architectural knowledge in premodern China. It convincingly shows that technical language served as a faithful carrier of contemporary popular culture and aesthetic concepts. Chinese Architecture and Metaphor demonstrates a high level of engagement with a broad spectrum of sophisticated Chinese sources. It will become a classic work for all students and scholars of East Asian architecture.

- Literary Ghosts from the Victorians to Modernism* Luke Thurston 2012-10-02 This book resituates the ghost story as a matter of literary hospitality and as part of a vital prehistory of modernism, seeing it not as a quaint neo-gothic ornament, but as a powerful literary response to the technological and psychological disturbances that marked the end of the Victorian era. Linking little-studied authors like M. R. James and May Sinclair to such canonical figures as Dickens, Henry James, Woolf, and Joyce, Thurston argues that the literary ghost should be seen as no mere relic of gothic style but as a portal of discovery, an opening onto the central modernist problem of how to write ‘life itself.’ Ghost stories are split between an ironic, often parodic reference to Gothic style and an evocation of ‘life itself,’ an implicit repudiation of all literary style. Reading the ghost story as both a guest and a host story, this book traces the ghost as a disruptive figure in the ‘hospitable’ space of narrative from Maturin, Poe and Dickens to the fin de siècle, and then on into the twentieth century.

Yahweh and the Gods and Goddesses of Canaan John Day 2010-06-15 This masterly book is the climax of over twenty-five years of study of the impact of Canaanite religion and mythology on ancient Israel and the Old Testament. It is John Day’s magnum opus in which he sets forth all his main arguments and conclusions on the subject. The work considers in detail the relationship between Yahweh and the various gods and goddesses of Canaan, including the leading gods El and Baal, the great goddesses (Asherah, Astarte and Anat), astral deities (Sun, Moon and Lucifer), and underworld deities (Mot, Resheph, Molech and the Rephaim). Day assesses both what Yahwism assimilated from these deities and what it came to reject. More generally he discusses the impact of Canaanite polytheism on ancient Israel and how monotheism was eventually achieved.

The Oxford Handbook of Names and Naming Carole Hough 2016-05-03 In this handbook, scholars from around the world offer an up-to-date account of the state of the art in different areas of onomastics, in a format that is both useful to specialists in related fields and accessible to the general reader. All known languages make use of names, most commonly to identify individual people and places. Since Ancient Greece, names have been regarded as central to the study of language, and this has continued to be a major theme of both philosophical and linguistic enquiry throughout the history of Western thought. The investigation of name origins is more recent, as is the study of names in literature. Relatively new is the study of names in society, which draws on techniques from sociolinguistics and has gradually been gathering momentum over the last few decades. The structure of this volume reflects the emergence of the main branches of name studies, in roughly chronological order. The first Part focuses on name theory and outlines key issues about the role of names in language, focusing on grammar, meaning, and discourse. Parts II and III deal with the study of place-names and personal names respectively, while Part IV outlines contrasting approaches to the study of names in literature, with case studies from different languages and time periods. Part V explores the field of socio-onomastics, with chapters relating to the names of people, places, and commercial products. Part VI then examines the interdisciplinary nature of name studies, before the concluding Part presents a selection of animate and inanimate referents ranging from aircraft to animals, and explains the naming strategies adopted for them.

Reading and Responsibility Derek Attridge 2010-05-27 What is the importance of deconstruction, and the writing of Jacques Derrida in particular, for literary criticism today? Derek Attridge argues that the challenge of Derrida’s work for our understanding of literature and its value has still not been fully met, and in this book, which traces a close engagement with Derrida’s writing over two decades and reflects an interest in that work going back a further two decades, shows how that work can illuminate a variety of topics.Chapters include an overview of deconstruction as a critical practice today, discussions of the secret, postcolonialism, ethics, literary criticism, jargon, fiction, and photography, and responses to the theoretical writing of Emmanuel Levinas, Roland Barthes, and J. Hillis Miller. Also included is a discussion of the recent reading of Derrida’s philosophy as ‘radical atheism’, and the book ends with a conversation on deconstruction and place with the theorist and critic Jean-Michel Rabate. Running throughout is a concern with the question of responsibility, as exemplified in Derrida’s own readings of literary and philosophical texts: responsibility to the work being read, responsibility to the protocols of rational argument, and responsibility to the reader.

Stanislavsky in Practice Vreneli Farber 2008 Stanislavsky in Practice focuses on the course of study pursued today by aspiring actors in Russia and on the philosophy that informs this curriculum. It draws on extensive observation during the academic year 2000-2001 of the actor training program of the St. Petersburg State Academy of Theatre Arts (SPGATI), one of the three most prestigious theatrical institutes in Russia, and on interviews of a wide array of individuals in the Academy. Although the years since 1991 have witnessed many changes in theater and in actor training - sources of funding, administration, choice of repertoire, new methodologies, etc. - there remains much continuity with the past. The core of this continuity is the Stanislavsky tradition, which nevertheless has been affected by the views of post-Soviet Russia. The developments in actor training from 1991 to 2001 reflect the challenges and problems faced by other institutions in the arts and sciences. In other words, the phenomenon of continuity and discontinuity with the past is characteristic of other institutions in Russia, cultural as well as scientific and educational.
