The Hidden Teaching Beyond Yoga Paul Brunton 2015-05-05 Inspired by his time spent with wise sages in Asia in the 1930s, Paul Brunton (1898-1981) wrote The Hidden Teaching Beyond Yoga (and its companion volume The Wisdom of the Overself) at the request of these remarkable teachers, who recognized that he had a significant role to play in the transmission of Hindu Vedanta and Buddhism to the West. Brunton's books are a profound re-creation of the teachings of those two philosophical schools of thought, informed by the insights of deep meditation. Clearly written without the specialized vocabulary found in those traditions, the books speak directly to the contemporary spiritual seeker. The Hidden Teaching Beyond Yoga is a step-by-step guide to actually experiencing the spiritual truth that reality is formed within our consciousness rather than outside us in the world of material things. Brunton's expert analysis of perception, grounded in science, is designed to awaken us to our sacred foundation and to transform our personality into a mirror of that reality. Brunton prepares us for this journey by describing the attitudes, mental disciplines, and character traits that are beneficial for success in this quest. This new edition has been updated to incorporate the author's final revisions and includes an introduction by the Paul Brunton Philosophic Foundation. Sexuality and Class Struggle Reimut Reiche 1971 This book which combines the methods and results of both Freud and Marx is by one of the leaders of the West German student left during its most militant phase in the late 1960s. For reasons the author makes clear, the anti-authoritarian movement took more thorough-going and trenchant forms in West Germany than anywhere else. A new sexual morality was not only preached but practised. Is it possible, however – the author asks – that this new emphasis on sexual enlight–enment and liberty can become merely a characteristic of Western capitalism, which serves to activate the market economy, deflect rebellion, and hence contribute to the preservation of the system? In answering this question Reiche explains and develops Marcuse's widely misunderstood concept of 'repressive desublimation'. He exposes the artificial and illusory nature of many attempts – in Germany and elsewhere – at 'sexual liberation', and shows why it is impossible to overcome sexual oppression and mystification in our society in isolation from the political struggle.

Emotion, Reason, and Action in Kant Maria Borges 2019-04-18 This book is open access and available on www.bloomsburycollections.com. It is funded by Knowledge Unlatched. Though Kant never used the word 'emotion' in his writings, it is of vital significance to understanding his philosophy. This book offers a captivating argument for reading Kant considering the importance of emotion, taking into account its many manifestations in his work including affect and passion. Emotion, Reason, and Action in Kant explores how, in Kant's world view, our actions are informed, contextualized and dependent on the tension between emotion and reason. On the one hand, there are positive moral emotions that can and should be cultivated. On the other hand, affects and passions are considered illnesses of the mind, in that they lead to the weakness of the will, in the case of affects, and evil, in the case of passions. Seeing the role of these emotions enriches our understanding of Kant's moral theory. Exploring the full range of negative and positive emotioms in Kant's work, including anger, compassion and sympathy, as well as moral feeling, Borges shows how Kant's theory of emotion includes both physiological and cognitive aspects. This is an important new contribution to Kant Studies, suitable for students of Kant, ethics, and moral psychology.

A Czech Dreambook Ludvík Vaculík 2019-10-01 It's 1979 in Czechoslovakia, ten years into the crushing restoration of repressive communism known as normalization, and Ludvík Vaculík has writer's block. It has been nearly a decade since he wrote his last novel, and even longer since he wrote the 1968 manifesto, "Two Thousand Words," which the Soviet Union used as one of the pretexts for invading Czechoslovakia. On the advice of a friend, Vaculík begins to keep a diary: "a book about things, people and events." Fifty-four weeks later, what Vaculík has written is a unique mixture of diary, dream journal, and outright fiction – an inverted roman à clef in which the author, his family, his mistresses, the secret police and leading figures of the Czech underground play major roles.

The Future of Registered Partnerships Jens M. Scherpe 2017-12-18 A book series dedicated to the harmonisation and unification of family and succession law in Europe. The series includes comparative legal studies and materials as well as studies on the effects of international and European law making within the national legal systems in Europe. The books are published in English, French or German under the auspices of the Organising Committee of the Commission on European Family Law (CEFL). In many jurisdictions registered partnerships were introduced either as a functional equivalent to marriage for same-sex couples or as an alternative to marriage open to all couples. But now that marriage is opened up to same-sex couples in an increasing number of jurisdictions, is there a role and a need for another form of formalised adult relationship besides marriage? In this book, leading family law experts from 15 European and non-European countries explore the history and function of registered partnership in their own jurisdictions. Further chapters look at the impact of the European Convention on Human Rights and European Union Law on the regulation of registered partnerships. In the concluding chapters the different approaches are analysed and compared. This book provides the foundation for an informed discussion not only on changes to the implementation of registered partnership schemes, but also more generally for reviewing the law concerning the recognition of adult relationships. About the editors: Dr Dr Jens M. Death and the Labyrinth Michel Foucault 2006-11-30 Death and the Labyrinth is unique, being Foucault's only work on literature. For Foucault this was "by far the book I wrote most easily and with the greatest pleasure". Here, Foucault explores theory, criticism and psychology through the texts of Raymond Roussel, one of the fathers of experimental writing, whose work has been celebrated by the likes of Cocteau, Duchamp, Breton, Robbe Grillet, Gide and Giacometti. This revised edition includes an introduction, chronology and bibliography to Foucault's work by James Faubion, an interview with Foucault, conducted only nine months before his death, and concludes with an essay on Roussel by the poet John Ashbery.

Desire and Distance Renaud Barbaras 2006 Desire and Distance constitutes an important new departure in contemporary phenomenological thought, a rethinking and critique of basic philosophical positions concerning the concept of perception presented by Husserl and Merleau-Ponty, though it departs in significant and original ways from their work. Barbaras's overall goal is to develop a philosophy of what "life" is[one that would do justice to the question of embodiment and its role in perception and the formation of the human subject. Barbaras posits that desire and distance inform the concept of "life." Levinas identified a similar structure in Descartes's notion of the infinite. For Barbaras, desire and distance are anchored not in meaning, but in a rethinking of the

philosophy of biology and, in consequence, cosmology. Barbaras elaborates and extends the formal structure of desire and distance by drawing on motifs as yet unexplored in the French phenomenological tradition, especially the notions of "life" and the "life-world," which are prominent in the later Husserl but also appear in non-phenomenological thinkers such as Bergson. Barbaras then filters these notions (especially "life") through Merleau-Ponty.

Bondarenko 2020-09-12 This book presents a novel and innovative approach to the study of social evolution using case studies from the Old and the New World, from prehistory to the present. This approach is based on examining social evolution through the evolution of social institutions. Evolution is defined as the process of structural change. Within this framework the society, or culture, is seen as a system composed of a vast number of social institutions that are constantly interacting and changing. As a result, the structure of society as a whole is also evolving and changing. The authors posit that the combination of evolving social institutions explains the non-linear character of social evolution and that every society develops along its own pathway and pace. Within this framework, society should be seen as the result of the compound effect of the interactions of social institutions specific to it. Further, the transformation of social institutions and relations between them is taking place not only within individual societies but also globally, as institutions may be trans-societal, and even institutions that operate in one society can arise as a reaction to trans-societal trends and demands. The book argues that it may be more productive to look at institutions even within a given society as being parts of trans-societal systems of institutions since, despite their interconnectedness, societies still have boundaries, which their members usually know and respect. Accordingly, the book is a must-read for researchers and scholars in various disciplines who are interested in a better understanding of the origins, history, successes and failures of social institutions.

About Russia, Its Revolutions, Its Development and Its Present Michal Reiman 2016-07-29 "The author analyzes modern Russian history from a new perspective. Due to the ideological heritage of the XIX and XX century, the social settings of the sociopolitical history of the USSR (1917-1945) have not been fully identified. Detailed examination of ideological and political concepts shows that the revolution of 1917 became not a middle class, proletarian movement, but rather a plebeian one. The misjudgment by the new power enabled growth but caused tremendous losses of human lives and material damages. Socialization of economy and strict centralization led to a new social structure and established terror as an instrument for social reorganization. WWII revealed the necessity of a correction of these developments, but the events of the Cold War circumvented any further considerations"--Provided by publisher. *The Social Gospel* Ronald Cedric White 1976 Author note: Ronald C. Romantic Aversions J. Douglas Kneale 1999 Romanticism is often regarded as a turning point in literary history, the time when writers such as Wordsworth and Coleridge renounced the common legacy of poets and sought to create a new literature. Yet despite their emphasis on originality, genius, and spontaneity, the first-generation Romantics manifest a highly intertextual style that, while repressing certain classical and neoclassical literary conventions, reveals a deep dependence on those same rhetorical practices. Repression results in the symptoms of originality but it inevitably leads to the return of tradition in a different form.

The Natural World as a Philosophical Problem Jan Patočka 2016-08-15 The first text to critically discuss Edmund Husserl's concept of the "life-world," The Natural World as a Philosophical Problem reflects Jan Patočka's youthful conversations with the founder of phenomenology and two of his closest disciples, Eugen Fink and Ludvig Landgrebe. Now available in English for the first time, this translation includes an introduction by Landgrebe and two self-critical afterwords added by Patočka in the 1970s. Unique in its extremely broad range of references, the work addresses the views of Russell, Wittgenstein, and Carnap alongside Husserl and Heidegger, in a spirit that considerably broadens the understanding of phenomenology in relation to other twentieth-century trends in philosophy. Even eighty years after first appearing, it is of great value as a general introduction to philosophy, and it is essential reading for students of the history of phenomenology as well as for those desiring a full understanding of Patočka's contribution to contemporary thought.

Historical Memory Versus Communist Identity Meelis Saueaok 2014 This collection consists of articles on the subjects addressed by the research conference The Shaping of Identity and Personality under Communist Rule: History in the Service of Totalitarian Regimes in Eastern Europe, held in Tallinn, Estonia, on 9-10 June 2011 and arranged by the Estonian Institute of Historical Memory Foundation and the Unitas Foundation. The organisers of the conference intended to describe, analyse and explain the state policies and activities used in Eastern Europe for shaping the Communist identity and personality by means of manipulating the historical consciousness, and the efficiency of those policies and activities, proceeding from the official historical approaches of the former Eastern bloc. Ideologically mutated history was the important component of the official, Communist identity. The artificial official history and the new historical identity it forced upon the population aspired to establish the sole possible truth by means of half-truths. Probably the most important thread that comes through every article in this collection is the conflict between the official, communist identity and the nation's historical memory, and its consequences.

Crash Proof Peter D. Schiff 2010-12-15 The economic tipping point for the United States is no longer theoretical. It is a reality today. The country has gone from the world's largest creditor to its greatest debtor; the value of the dollar is sinking; domestic manufacturing is winding down - and these trends don't seem to be slowing. Peter Schiff casts a sharp, clear-sighted eye on these factors and explains what the possible effects may be and how investors can protect themselves. For more than a decade, Schiff has not only observed the U.S. economy, but also helped his clients reposition their portfolios to reflect his outlook. What he sees is a nation facing an economic storm brought on by growing federal, personal, and corporate debt, too-little savings, a declining dollar, and lack of domestic manufacturing. Crash-Proof is an informed and informative warning of a looming period marked by sizeable tax hikes, loss of retirement benefits, double digit inflation, even - as happened recently in Argentina - the possible collapse of the middle class. However, Schiff does have a survival plan that can provide the protection that readers will need in the coming years.

The Coming of Sound Douglas Gomery 2005-07-08 The coming of sound to film was an event whose importance can hardly be overestimated; sound transformed not only the Hollywood film industry but all of world cinema as well. As economic and film historian Douglas Gomery explains, the business of film became not only bigger but much more complex. As sound spread its power, the talkies became an agent of economic and social change through the globe, extending America's reach in ways that had never before been imaginable. This is an essential work for anyone interested in early film, film history and economics, and the history of the American media.
