Growing Up with Manos

Growing Up with Manos Jackey Neyman Jones 2016-03-26 For Jackey Neyman Jones, who played Debbie in Manos: The Hands of Fate, the "worst movie ever made" is, at its heart, a home movie that just happens to be shared with the world. Equal parts memoir/family saga/film book, Growing Up with Manos: The Hands of Fate shares the behind-the-scenes story of the making of Manos: from creator Hal Warren's alleged bet with TV producer Stirling Silliphant that "anyone could make a movie," to the tragic suicide of John Reynolds (Torgo), right up through the newest Manos-related projects that are carrying the film into the digital age. Jackey's stories dispel much of the Manos mythology while crystallizing a unique time and place in America, where a crew of actors with a bad script and a rented camera set out to make a bad movie-and succeeded beyond their wildest dreams. Jackey Neyman Jones is a professional artist living in the Great Northwest. Laura Mazzuca Toops is a writer/editor with more than 30 years' experience in business and fiction writing. She is the author of three historical novels.

Twelve Years a Slave Solomon Northup 101-01-01 "Having been born a freeman, and for more than thirty years enjoyed the blessings of liberty in a free State—and having at the end of that time been kidnapped and sold into Slavery, where I remained, until happily rescued in the month of January, 1853, after a bondage of twelve years—it has been suggested that an account of my life and fortunes would not be uninteresting to the public." - an excerpt

Social Work in Europe Charlotte Williams 2013-09-13 It is an acknowledged if not accepted fact that all European societies are being fundamentally transformed, and indeed perceptively unsettled, by increased migrations across nations and by the asserted presence of established minorities within their borders. The scale and speed at which these transformations have taken place have brought in their wake considerable social impacts and no small measure of fear and anxiety. Encounters with such diversity are part and parcel of the social work task, and learning how to negotiate them should be a de facto aspect of the training and continuous professional development of social workers and other social professions. However, the moral and political dimensions of the role, scope and nature of the social work task in responding appropriately to these changed and changing realities are rather more contested. This volume addresses many dimensions of the response to issues of race and ethnicity in social work practice in Europe. It extends the debates on inter-cultural and race equality practice in social work through a stimulating and innovative collection of contributions. This book was originally published as a special issue of the European Journal of Social Work.

AHCC Fred Pescatore 2010 The lowly mushroom, grown quietly, in the dark, has suddenly sprung onto the health scene as a miracle cure. Once castigated as a mere fungus, the mushroom has acquired a signature cachet in the form of active hexosecorrelated compound (AHCC), a nutritional product made from healing mushrooms fermented in rice bran. AHCC is used in over 700 clinics and hospitals in Japan, mainly in cancer treatment.Now Japan's secret has crossed the Pacific, and The Science of AHCC reveals what the Japanese have known for decades: AHCC is as well-researched as any conventional prescription drug. The quality control of AHCC is so stringent that it would easily qualify as a licensed pharmaceutical, but the manufacturers believe that this would limit its availability to the many people in Japan-healthy people, who use it as a preventive as well as for a variety of other purposes. Because it is actually a mushroom-based food, even though it is often made available in capsule form, it is extremely safe for anyone to take, including children, pets, frail elderly, and patients who have undergone surgery. The Science of AHCC explores this supplement in depth, explaining:o How it is manufactured How it is used in clinics in Japan and other parts of the worldo Its safety and efficacy o The scientific evidence supporting its striking versatility and profound effectiveness for a wide variety of conditions The Science of AHCC will introduce readers to AHCC and expand their knowledge of one of the most important food supplements available on the market today.

Stand Firm Paul Gould 2018-11 In an age of skepticism and disenchantment, people long for something that satisfies our mind's search for truth and our heart's desire for beauty and meaning. Stand Firm: Apoletics and the Brilliance of the Gospel argues that the gospel satisfies both of these needs. It is true and rational, but it is also inherently attractive and provides meaning and purpose. In short, the gospel is brilliant. It is brilliant, in one sense, because of the broad variety of evidences for its truth. But it is also brilliant given its beauty, goodness and the meaningful life it offers. The book provides up to date responses to questions about the existence of God, the reliability of the Bible, Jesus and the resurrection, and the problem of evil. It also treats unique topics such as understanding truth, knowledge and faith, the claims of alternate faiths, religious disagreement, etc. Each chapter attempts to connect these considerations with the gospel so that we may stand firm in our faith.

These are questions that have, until recently, remained mysterious. Now The Music Instinct explores how the latest research in music psychology and brain science is piecing together the puzzle of how our minds understand and respond to music. Ranging from Bach fugues to nursery rhymes to heavy rock, Philip Ball interweaves philosophy, mathematics, history and neurology to reveal why music moves us in so many ways. Without requiring any specialist knowledge, The Music Instinct will both deepen your appreciation of the music you love, and open doors to music that once seemed alien, dull or daunting, offering a passionate plea for the importance of music in education and in everyday life. The old moralistic approach and the more recent behavioral and psychological treatment approaches have a dismal record of failure, largely because they pay little or no attention to the crucial physiological and nutritional needs of alcoholics.
